and Development**
Invest in Health, Rights and the Future

2-4 September 2009 | Berlin, Germany

Matters of relationships, sex and sexuality are important to most youth no matter if they are sexually active or not. Youth need and wish for accessible information and services in making decisions regarding their own well being.

The existing efforts are few and they are rooted in the catholic belief system.

We want a true secular state.

“Queremos un verdadero estado laico”.

Análisis

Youth are in many ways the most marginalized group in the world and the one with the least access to information and services of sexual and reproductive health.

Los jóvenes somos , en muchos sentidos, el grupo más marginalizado en el mundo y el que menos acceso tiene a información y servicios de salud sexual y reproductiva.

There are no campaigns that are designed for and/or by youth and that take into account their needs and ,much needed information. The statistics on HIV/AIDS have increased: of the 22,500 diagnosed people, 90% are between the ages of 24 and 39 years of age. And 91% of them have been infected through sex.

No existen campañas que partan de las necesidades. Información necesaria y oportuna

La cifras de VIH/Sida , Han aumentado de las 22 500 personas diagnosticadas , el 90% se concentra en personas de 24 a 39 años de edad Y EL 91% lo adquieren por la vía la vía sexual.

Análisis

Gender affects the lives and the experiences of youth. For example young people, and especially young girls and women, are deeply affected by the stereotypes of gender and gender inequality. and El género afecta la vida y las experiencias de los jóvenes. Por ejemplo la gente joven, especialmente las niñas y las mujeres jóvenes, son profundamente afectadas por los estereotipos de género y la inequidad de género.

The facts regarding vulnerability and violations of human rights increase for young people. For HIV positive persons it they double, and they triple when the person is a woman. It is much worse when the person is lesbian, bisexual, homosexual, trans, etc.

los factores de vulnerabilidad de las violaciones a los derechos humanos incrementan. por ser joven y por tener vih o Sida son dobles , triples cuando se es mujer. o cuando soy lesbiana , bisexual , homosexual, trans.

What we do. The Women's Movement Action Positive Women. Results and successes

- Encouragement of training programs in sexual and reproductive health and prevention in HIV/AIDS on a national level.
- Implementation of frequent monitoring in the quality of HIV services for 18 Public Health Centers for HIV positive persons.
- Training of 50 women leaders directly or indirectly affected by HIV.
- Participation in the National Association of Positive People's projects, *New Life*. We have also participated in projects regarding the Reduction of Stigma and Discrimination against HIV positive people.
