# Unsafe Abortion in Indonesia

# In the Absent of Law

Hospital  
OBGYN

**Abortion is not  
a Medical Problem**

**It is more a Legal Problem !!!**

# Current Situation of the Health Law

(will be passed on Sept.15, 2009)

- Abortion is only permitted:
  - when a woman was raped
  - when the health of the woman or the fetus is in danger
  - the above procedure can only provided if the pregnancy is not more than 6 weeks and after the approval of a religious leaders
- Sanction: Jail for 15 years or fined Rp 10 billion = USD 1,000,000

# Conclusion:

- This is an example of blatant violation of human (women's) rights.
- This is also the concrete evidence that the government, decision-makers, parliamentarians, medical health organizations still need to be educated and become aware of the Cairo agenda in order to implement the commitment.
